

AIMAN MUSHTAQ

Full-Stack Developer • AI-Driven Development & Cloud-Deployed Applications

Ottawa, ON | aiman03at@gmail.com | linkedin.com/in/aimanmushtaq89 | github.com/Aiman03at | aiman-mushtaq.vercel.app

SUMMARY

Full-stack developer with 3+ years of production engineering experience and a strong, demonstrated focus on AI-driven development — building applications with React/Next.js, Node.js, and Python (FastAPI), and integrating LLM APIs and AI coding agents directly into the build process. Recently placed 2nd among 100 selected builders at the Scale Without Borders AI Hackathon (Toronto Tech Week 2026), shipping a production-grade AI application solo in 24 hours. Comfortable moving between deep-focus implementation and client-facing architecture discussions. Canadian Permanent Resident, available for remote work.

TECHNICAL SKILLS

AI-Driven Development: Claude API, OpenAI API, Model Context Protocol (MCP), Claude Code, AI coding agents, prompt engineering, agentic workflows

Front-End: React, Next.js, TypeScript, JavaScript (ES2022+), Vite, Tailwind CSS, Responsive Design

Back-End: Node.js, Express, Python, FastAPI, REST APIs, Microservices, WebSockets, Prisma ORM

Databases: PostgreSQL, SQL, schema design, query optimization and indexing, pgvector

Cloud & DevOps: AWS (Aurora PostgreSQL, RDS), Docker, GitHub Actions (CI/CD), Vercel, Render, Railway, Linux, Git, automated testing (Jest, 80%+ coverage)

PROFESSIONAL EXPERIENCE

Software Engineer | Connect Smart Consulting, Hyderabad | 2020 – 2023

- Designed and shipped RESTful APIs and backend services serving 10,000+ production users, with a focus on scalability and maintainability.
- Improved API response time by 40% through query optimization, database indexing, and payload reduction.
- Reduced React front-end load time by 35% via code splitting and component refactors.
- Maintained 80%+ automated test coverage (Jest) across client-facing applications as part of a continuous integration workflow.
- Owned the full delivery lifecycle — requirements gathering, architecture, implementation, deployment, and post-launch support — for multiple client engagements.

SELECTED PROJECTS

Safe-Hire | AI Job Posting Analyzer • safe-hire-delta.vercel.app

- Built solo in 24 hours using Claude API end-to-end for content generation and analysis; placed 2nd among 100 selected builders at the Scale Without Borders AI Hackathon (Toronto Tech Week 2026).
- Shipped three modes (fraud detection, pre-screened job search, posting quality audit) using React, TypeScript, and the Claude API; fraud detection scored 95/100 on internal benchmarks.

AI Governance Cockpit | B2B Compliance & Risk Tool for AI Outputs • <https://governance-cockpit.vercel.app/>

- Building a compliance/risk monitoring platform for AI-generated outputs using Next.js 15, Prisma, and AWS Aurora PostgreSQL with pgvector for semantic search; front end deployed on Vercel.

SupplySync | Real-Time Supply Chain Platform

- Architected a monorepo platform with WebSocket-based real-time data sync, ML-driven predictive analytics, and Docker containerization.
- Built a full CI/CD pipeline using GitHub Actions across React, TypeScript, Node.js, and FastAPI services.

Daycare Management System | Full-Stack Platform • <https://daycare-management-lake.vercel.app/>

- Built a role-based (Admin, Educator, Parent) full-stack platform with JWT authentication, child profile management, attendance, meals, and health tracking; 94% TypeScript.
- Deployed front end on Vercel and back end on Render with a PostgreSQL database, resolving production CORS, connection pooling, and SSL configuration.

EDUCATION & CERTIFICATIONS

M.Sc., Computer Science • JNTU Hyderabad • 2014

B.Sc., Computer Science & IT • Osmania University • 2011

Full-Stack Web Development • Lighthouse Labs, Ottawa • 2024

Anthropic: Claude 101, Claude Code 101, Introduction to MCP, Introduction to Agent Skills, AI Fluency Framework & Foundations, AI Capabilities & Limitations (Claude Certified Practitioner in progress)

ISTQB Foundation Level v4.0 • Microsoft Azure Fundamentals (AZ-900) • Cisco Python Essentials 1 & 2

Status: Canadian Permanent Resident • Eligible to work without restrictions • Published on Dev.to and Hashnode
